

Elevate Your Expertise with a Ph.D. in Occupational Health and Safety

Join the World Bank Africa Centre of Excellence for Oilfield Chemicals Research for a Ph.D. in Occupational Health and Safety that equips you to address workplace hazards and promote a culture of safety in high-risk industries. Our programme integrates advanced research in safety technology, risk assessment, industrial hygiene, and regulatory compliance to prepare graduates for impactful leadership roles.

With a focus on oilfield environments and other sectors, you'll gain critical skills in hazard mitigation, emergency preparedness, and health impact assessments. Our state-of-the-art facilities and expert faculty provide an exceptional learning experience, fostering innovative research that aligns with global health and safety standards.

Graduates are positioned to influence policy, enhance workplace safety systems, and lead sustainability-focused initiatives. Admission is open to candidates with a relevant master's degree and a passion for health and safety leadership.
